

To the FCC if you win in changing the way XM radio does bussiness then you would have to make satilite and cable tv change also. XM radio gives me the choises to block any channel I want blocked. I am a truck driver uses the traffic and weather to keep an ear on traffic jams to get around to keep the freight moving. On xm radio if there is something you do not want to listen to you can do a couple of things. 1 you can change the channel 2 you can turn off the radio. So in other words (DO NOT CHANGE THE WAY XM DOES BUSSINESS).

SINCERALLY

WILLIAM RICHARDSON

LOYAL XM LISTENER
